

## **City of Harker Heights Drought Response Stage 1**

### **Stage 1-Voluntary Water Conservation**

The goal for Stage 1 is to reduce and maintain average daily water demand at or below 7.2 million gallons per day (MGD) or 80% of system capacity by raising public and customer awareness of water demand conditions. The City of Harker Heights is currently pumping over 8 MGD this month.

The Brazos River Authority has triggered their Stage 1 Drought Contingency Plan based on current lake levels at the following lakes: Possum Kingdom, Granbury, Whitney, Aquilla, Proctor, Belton, Stillhouse Hollow, Georgetown, Granger, Limestone and Somerville. The City of Harker Heights receives all of its treated drinking water from Lake Belton.

Water use customers shall voluntarily limit outdoor water use by participating in the watering schedule for outdoor water use effective **August 17, 2011**.

### **City of Harker Heights 2011 Voluntary Outdoor Watering Schedule**

**Outdoor watering limited to once every five days on any day of the customer's choice. Outdoor water use is discouraged between the hours of 9:00 a.m. and 8:00 p.m. except with hand-held hoses.**

Should you have questions, please call the City of Harker Heights Public Works Department at 953-5649.
